Bunka Designer Gakuin College.
Department of Advertising and
Promotion Design.
3rd year student.

About

At the technical school, I mainly studied graphic design, video animation, web design, etc. using Adobe applications. I studied graphic design, video animation, and web design. I learned the joy of graphic production in class and wanted to become a designer who can create my own unique graphics.

This book is Kurosaki's portfolio.
The text of this book is written using
Deepl.

- 4:Me and Music.

My Logo

This is a personal project

I did during my junior year.

I created the logo mark for “Suimin”.

The logo is also used for SNS icons
and business cards.

The name is a combination of my favorite word
“sleep” and “Midori-green”.

I simplified the upper part of “Midori” and made
it ZZZ to express “sleep”.

Sleep and grow, Waking up to learn.

To make it easier to see the top as a Z

I tried to put a line in the middle of the Z,

But I decided not to do so because it would
have made it difficult to see.

Logo mark in different colors and,

We also produced the logo in different colors
and with the paint and lines reversed.

Missing Girl

Who
is this
girl?

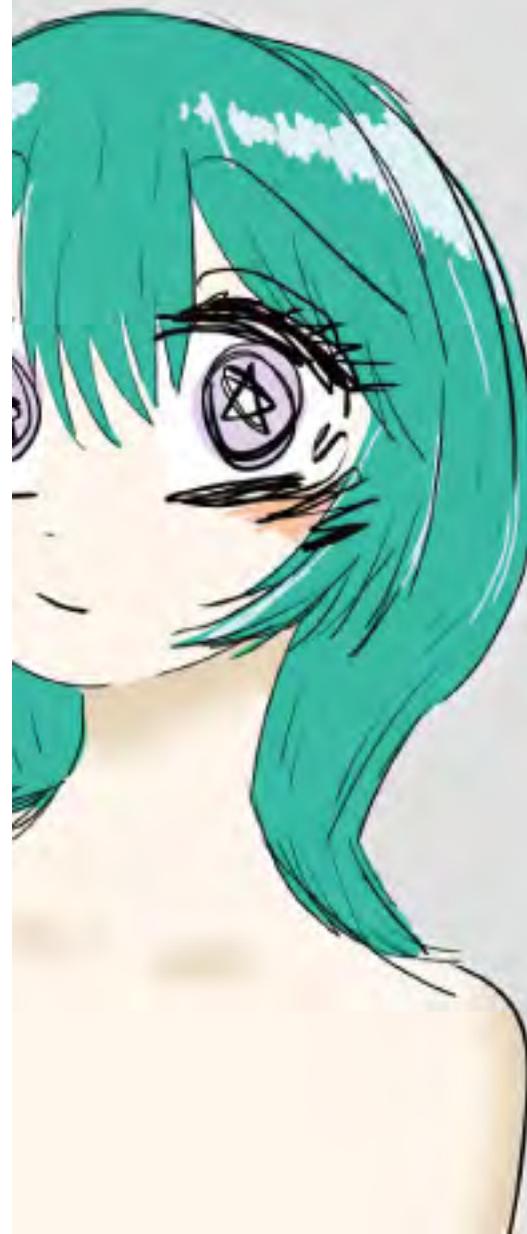

Where
did she
come
from
and
where

did she go?

Is there
anyone left
who can

remember her?

KO-UN

KO-UN means clouds flowing in the sky.

A related word to “KO-UN” is “ko-un ryu-sui,” or “flowing water. ko-un ryu-sui” is a metaphor for not being attached to things and letting nature take its course, just like the clouds in the sky and the water flowing through it. It is also a metaphor for the fact that

This work was once painted in analog.

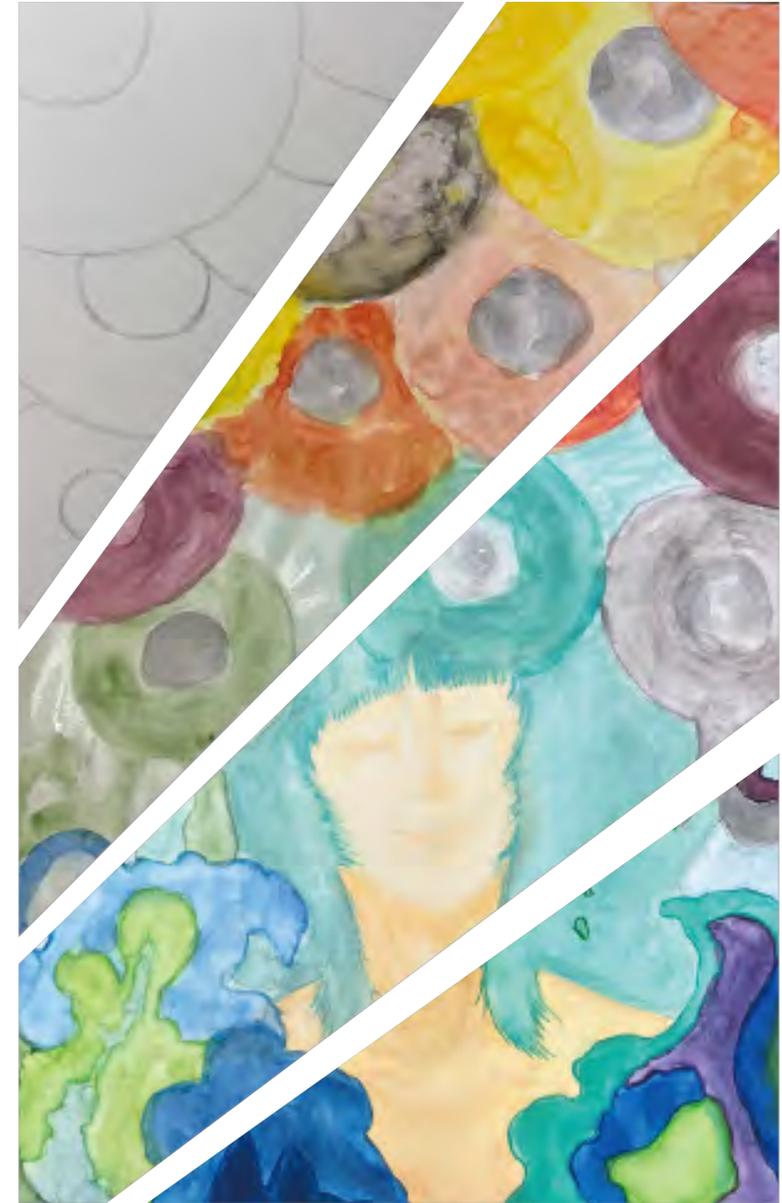

The work was then made into a digital work by using the “image tracing” function of Adobe Illustrator.

Me and Music.

progress

I love to listen to music.
So I decided to use music as the theme for this piece.
The concept of this work is music that blends in with me.
Music is not only in my life, but also in my body and in my mind.

This work depicts “me” listening to music and “the music that comes inside me”.
I expressed the music that comes into me in the form of melting records.
I listen to various genres of music, so I made the record colorful to express that.

Melody, sound, lyrics, time, people,
instruments...

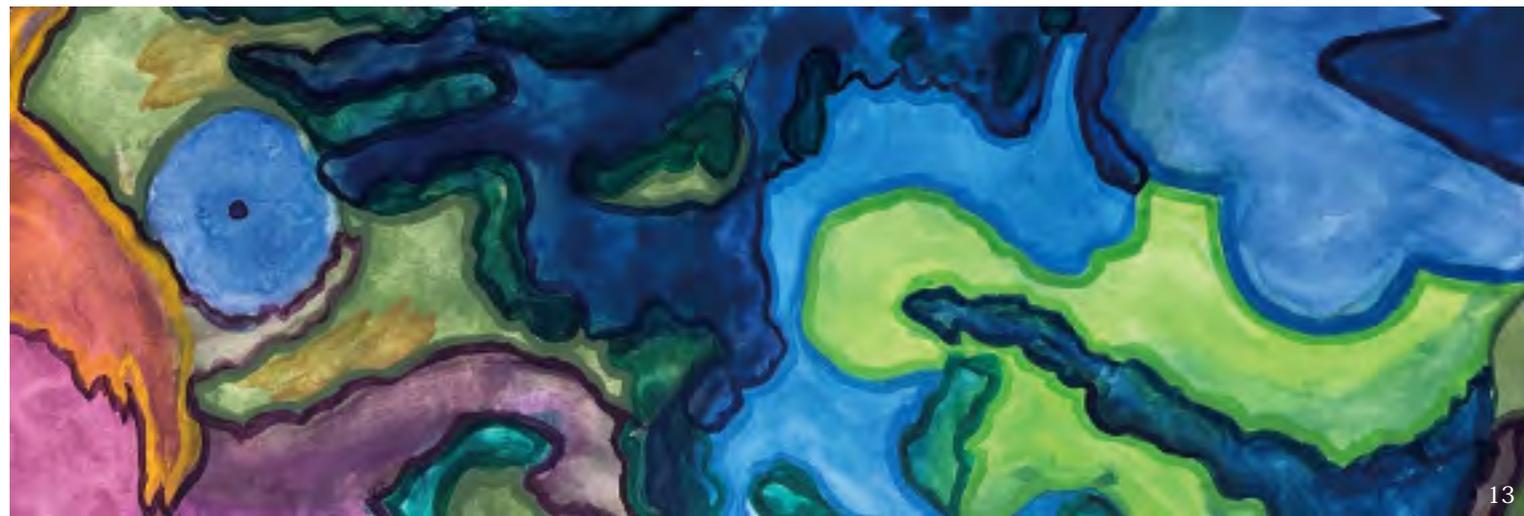

I can imagine many things in just one song.
When I think about such things, my heart
seems to be in a dance. Then this music
melts into me.

It seems that the A-side is over. I get up and
put on the music again.

**Her sad emotions,
flowed away with the sound.**

Play music.
I turn on the record player and speakers,
take out the record, set it, and drop the
needle.
The sound starts to flow.
Listening to the music, I feel as if I am in
that time period, that world.
I love this time.

編集後記

この雑誌では私の作品を英語で紹介していますが、私は英語が読めないうえに書くこともできません。

なので全ての文章をDeepLという翻訳ツールを使用して制作しました(もともになる文章は自分で考えています)。

何故英語ができないのに英語の雑誌にしたのかというと、海外感のある(?)スタイリッシュでお洒落でかっこいい雑誌をつくりたかったからです。

前記の事もそうですが、今回の雑誌制作では色々な事ができたので、私にとって非常に良い経験になったと思います。ありがとうございます。

そしてこの雑誌を読んでいるあなたにも感謝を伝えたいと思います。

こんな私を見つけてくれて、どうもありがとう。

デザインは私のもの。

世界はあなたのもの。
